HELP!!! Do you, or someone you know, have a nice, working vacuum you could donate to the shelter? If you do, please call!!! 423-0505

WE'RE LOOKING FOR OUR FOREVER FAMILIES...CAN YOU HELP US?

WANTED: A good home.

Kenny is an adult male black lab. Full of energy and great with kids, Kenny is an awesome dog for an active family. He is not neutered and still needs a rabies shot. He was a stray found in Saratoga. He likes other dogs and doesn't mind cats. Kenny is great on a leash and is very smart so he will be easily trainable.

I hope someone will take me home!

Chewy is an 8-month-old male Shepherd/Bull Terrier mix. He was surrendered to the shelter because of owner allergies. Chewy is very friendly and energetic – great for a couple with children or an active family. Has \$50.00 Sponsor toward neuter. He does still need rabies shot. He will grow to be medium size. Loves other dogs but can get a little rough when playing.

OUR MISSION STATEMENT

THE SOUTH WOOD COUNTY HUMANE SOCIETY IS A COMMUNITY NON-PROFIT ANIMAL CARE ORGANIZATION. OUR MISSION IS TO BUILD A STRONGER BOND BETWEEN PEOPLE AND THEIR PETS THROUGH EDUCATION AND ADOPTION WITH THE OVERALL GOAL OF PROMOTING THE SPAYING AND NEUTERING OF ANIMALS TO HELP REDUCE PET OVER-POPULATION.

LETTER FROM THE DIRECTOR

Greetings everyone,

I am very proud to be the new "Top Dog" of South Wood County Humane Society!

I am a native Maineiac, born and raised in a small paper mill town in northern Maine. I received my Bachelors of Science degree in Business Administration from the University of Maine, and a business teaching degree from Husson College of Bangor Maine. I have lived in Wisconsin for 14 years now (but still have a little Maine accent I'm told). I love it here!! I am married to Ann (a teacher at Lincoln High School) and have two beautiful daughters, Becca and Maria. I am a life long animal lover, and currently have a dog (11 year old Doberman / lab mix named Worf) and 2 young kittens (twin sister and brother named Sugar and Rascal).

I have heard many stories about animals in my short time here; some sad, but many more happy and uplifting. One such story is our own "Miracle". Miracle came to us because of a call from a citizen who had the young dog placed and abandoned on her doorstep. He was barely alive when we got him to the shelter, struggling to move or stand. He was full of infection, but you could see the life in his eyes. With help from some local veterinarians and a lot of care and love from our staff, Miracle has become his namesake. He now greets us happily every morning; tail wagging as he grows livelier every day. He has gained a significant amount of weight, and has begun to show a very playful personality. He has a long way to go, but has come so far already. Stories like his make working here at the shelter very rewarding.

The staff here strives for excellence and gives so much love to the animals. It has been a pleasure getting to know all of them. Beth Peabody, our Pet Care Coordinator, helps to lead a great group of people who take great pride in what they do. I invite all to come in and visit the shelter. We are making many changes here, and will continue to do so to make the shelter a better place for the animals and their new families.

I want to thank everyone for all you do to help the animals. In my brief month here, I have been amazed by the outpouring of kindness and time given to the shelter by this wonderful community. You help us make "Miracles" happen.

Phil Hartley
Executive Director, SWCHS

Remember to watch Public Access on the first Wednesday of the month! Phil (and guests) have an hour-long live TV show, starting at 9:00 a.m. The show will be replayed at 5:00 p.m. Check it out!

WHY SPAY OR NEUTER?

This low-cost surgery offers you and your pet many, many advantages.

PEACE OF MIND *Did you know that a spayed or neutered (sterilized) animal is better behaved?*

Males – Neutered cats and dogs focus their attention on their human families, whereas unsterilized, unsupervised males roam in search of a mate, risking injury in traffic and in fights with other males. They mark territory by spraying strong-smelling urine on surfaces. Indoors, male dogs may embarrass you by mounting furniture and human legs when stimulated. Don't confuse aggressiveness with protectiveness; a neutered dog protects his home and family just as well as an unneutered dog, and many aggression problems can be avoided by early neutering.

Females – While their cycles vary greatly, most female cats exhibit the following signs when in heat. For four or five days, every three weeks, they yowl and urinate more frequently – sometimes all over the house – advertising for mates. Often, they attract unneutered males who spray urine around the females' home. Female dogs also attract males from great distances. Female dogs generally have a bloody discharge for about a week, and can conceive for another week or so.

GOOD MEDICINE *Did you know that a spayed or neutered animal will live a longer, healthier life?*

Spaying a female (removing the ovaries and uterus) or neutering a male (removing the testicles) are veterinary procedures performed under general anesthesia. Both surgeries usually require minimal hospitalization.

Neutering a male cat or dog by six months of age prevents testicular cancer, prostate disease and hernias. Spaying a female cat or dog helps prevent pyometra (a pus-filled uterus) and breast cancer; having this done before the first heat offers the best protection from these diseases. Treatment of pyometra requires hospitalization, intravenous (IV)

fluids, antibiotics and spaying. Breast cancer can be fatal in about 50 percent of female dogs and 90 percent of female cats. With an older, seriously ill animal, anesthesia and surgery are complicated and costly.

RESPONSIBLE CARE *Did you know that you can help prevent the suffering and death of millions of animals?*

Almost everyone loves puppies and kittens, but some people lose interest when these animals grow up. As a result, millions of cats and dogs of all ages and breeds are euthanized annually or suffer as strays. Many of these were the result of unwanted, unplanned litters that could have been prevented by spaying or neutering. Rarely surviving for more than a few years on their own, strays die painfully by starvation, disease, freezing or being hit by cars.

JUST THE FACTS, PLEASE

Myth – A female cat or dog should have a litter before she is spayed.

Fact – The sooner you spay your female, the better her health will be in the future. As long as a kitten or puppy weighs more than two pounds and is two months old, he or she can be neutered or spayed. Many veterinarians are practicing perfectly safe early sterilization. The likelihood of developing mammary tumors or uterine infections increases the longer a female goes unspayed. In fact, a female spayed before sexual maturity (six to nine months of age) has one-seventh the risk of an intact female of developing mammary cancer.

Myth – Spaying or neutering (sterilization) will alter my pet's personality.

Fact – Any slight changes will be positive. Regardless of the age when spayed or neutered, your pet will remain a caring, loving and protective companion. Neutering will reduce the need to breed, and that has a calming effect on many animals. Both neutered male canines and felines tend to stop roaming and fighting and lose the desire to mark their territory with urine.

Myth – Companion animals will become fat and lazy if they are neutered.

Pictured above is "Miracle", the amazing puppy that Executive Director Phil Hartley spoke about in his letter. Stop by the shelter to meet "Miracle"!

Fact – Absolutely not! Lack of exercise and overfeeding make pets fat and lazy – not neutering. Your pet will not gain weight if you provide exercise and monitor food intake. Neutering is good for your pet, since sterilized pets tend to live an average of two to three years longer than unsterilized pets.

Myth – Sterilization is a dangerous and painful surgery for my pet.

Fact – Spaying and neutering are the most common surgeries performed on animals. With a minimal amount of home care, your pet will resume normal behavior in a couple of days.

Myth – Children should witness the miracle of birth.

Fact – Countless books and videos are available to teach your children about birth in a responsible manner. Letting your pet produce offspring you have no intention of keeping is teaching your children irresponsibility. Anyone who has seen an animal euthanized in a shelter for lack of a home knows the truth behind this dangerous myth. Many states and counties have established low-cost spay/neuter programs that make the surgery affordable. Many cities also offer reduced licensing fees for owners of spayed and neutered pets. To find a low-cost program near you, call your local humane society, shelter or call toll-free (800) 248-SPAY. If there is no low-cost program in your area, and you would like to see one established, contact The ASPCA Government Affairs department at (212) 876-7700, ext. 4550.

Let me introduce myself. You probably already know me by sight because I'm really famous. I'm Dixie Doodle – the beautiful black cocker spaniel whose picture was in the Daily Tribune to help advertise the Dog-o-Rama part of The Grand Affair this fall. I hate to brag, but my team got second place in the Fashion Race and I was awarded the special Golden Pooper Scooper Award – I bark at it every time I see it in the garage.

I always do what I can for my little (and big) buddies at the SWCHS who don't have Mommies and Daddies like I do to love me and take care of me. Because I'm so gorgeous, I was in the 2006 calendar, I've had my picture taken with Santa, and I won third place in the 2004 Pet Pictures contest. Anyway, enough about me.

I have a story to tell you. This story is about two other little black cocker spaniels. They lived outside in the world until somebody found them and brought them to the SWCHS. At least I think they lived outside – they were so skinny, malnourished, filthy, matted, and scared that I'm sure nobody took care of them. And if they did have a mom and dad, they were very bad people. Anyway, my Mom's friend, Karen, called Mom and asked whether we knew of anybody who might like a couple of pups just like me. Mom thought of Auntie Pammie and Uncle Pete right away. Auntie Pammie and she said she wanted them right away before even asking Uncle Pete. Well, Uncle Pete is a pushover for Auntie Pammie, so they went to the Shelter to take a look at those little ones. They were a mess – so skinny they had bones sticking out everywhere. They had had a bath, but they were still nasty looking. Their beautiful long cocker ears were matted and stuck together and they had sticks and stuff all over in their fur. Auntie

Pammie and Uncle Pete weren't sure they could take the dogs because they needed to find out if their two kitties, Mocha Kiss and EmmaLu, would like them.

Anyway, the nice folks at the Shelter said that the really kind ladies at Creative Paws, where I get my lovely hair done, would be willing to cut all that icky stuff off the fur of the new kids. And so they did. When the new kids got done with their hairdos, the Shelter called Auntie Pammie (AP) and Uncle Pete (UP) so they could 'foster' the new kids for a few days.

Dixie, Izzy & Toby with Santa at the Christmas Bazaar.

Em and Moch didn't like the kids. They hissed and spit and growled and put up a fierce fuss. But AP and UP thought they were adorable and even gave them names. The littlest one became Izabella and the bigger boy became Toby. Toby and Izabella were very quiet. They never ever barked and it was hard to get them to eat at first.

It didn't take long at all for Izabella and Toby to bond with AP and UP. Whenever my Mom and Dad went to visit them, one was with AP and one was with UP. They followed

them everywhere, even crying when UP went out on errands. They all fell in love.

Em and Moch still didn't like the kids. But then Em started to come and watch them. UP taught Toby to play with a toy and he even learned to bring it back to him. Izzy would chase a toy too but never brought it back. AP brought Moch in the room and held her next to Izzy and she growled and spit and hissed and put up quite a fuss. She never got near Izzy, but she sure let her know she wasn't welcome. Then one night Moch was on AP's lap and Izzy was sleeping on one side of AP and Toby was on the other side. And Moch didn't growl! Or spit and hiss! She still didn't like the new kids, but she doesn't hate them anymore, either. And so AP and UP went and signed some papers and now Izzy and Toby have a forever home with Auntie Pammie and Uncle Pete and EmmaLu and Mocha Kiss.

And that's the happy ending!
Love, Dixie ♥

DONATIONS SHOWN ARE FROM OCTOBER 2006-MARCH 2007

PLEASE ACCEPT OUR APOLOGIES FOR ANY ERROR OR OMISSIONS FOR DONATIONS NOT ACKNOWLEDGED.

The South Wood County Humane Society keeps our doors open with the revenues from donations, memberships, fundraising events, municipal contracts and monies generated by our operations. We are a non-profit organization. We are not a part of any other regional or national humane society or SPCA. All contributions to SWCHS are tax-deductible and help domestic animals in the South Wood County area. We respect the privacy of our members; therefore, we do not sell or exchange the names of our donors.

A VERY SPECIAL THANK YOU TO...

- * Aqua Appliance and Roger Ewert for the Washer/Dryer help!
- * Unifirst Corporation and Gary Wadsworth for the scrubs you'll see our staff wearing!
- * Dana and Tracy Rice, Ann Hartley, and Shannon and Steve Babilus for Painting – great work!
- * Support from Helen Mead
- * Paper Cities Savings for proceeds from the Beanie Babies sale
- * Checkers Drive-In for their fundraising donation *
